1. SOME ISSUES ON STRUCTURE OF ECONOMY-CONCENTRATED AREAS IN THE SOUTH BASING ON I/O TABLES

Bui Trinh - Bui Quoc

Inter-area I/O models are one of the strong tools used to analyze the interactive impact between areas. The authors have used these models to review structure of economy-concentrated areas in the South, through results from a calculation of statistical data in 2004 and 2005, the authors have drawn the following important conclusions:

- Structure of the economy-concentrated areas in the South in 2004 is 2% higher than that in 2005;
- The growth of the economy in three economic sectors I, II and III is not even;
- The strong growing of the processing industry and construction has made the pervasive of other branches unable to exceed the average level.

2. SEVERAL FEATURES OF THE POPULATION GROWTH IN HO CHI MINH CITY

Nguyen Van Trai

Ho Chi Minh City is the most populous administration units in the country, and it has an uneven population growth between time periods, on average:

- In 1980 - 1985 it had an annual growth rate of 1.57%;
- In 1985 - 1990 it had an annual growth rate of 2.13%;
- In 1981 - 1995 it had an annual growth rate of 2.41%;
- In 1996 - 2000 it had an annual growth rate of 2.21%;
- In 2001 - 2005 it had an annual growth rate of 2.00%.

3. EXPERIMENTAL LESSONS LEARNED FROM THE RURAL, AGRICULTURE AND FISHERY CENSUS IN HA TINH PROVINCE

Tran Thanh Binh

Ha Tinh is one amongst provinces which have well undertaken the 2006 Rural, Agriculture and Fishery Census, thank to:

- Good implementation of the preparatory work, including: establishment of the Census Steering Committee at all levels; conduct of professional training for cadres and organization of a wide publicity campaign, etc.;

- Well steering the data collection, checking and questionnaire processing in accordance with the Census Plan;

However, for a better promotion of the Census results we should:

- Reduce the time of data processing and dissemination
- Have a high unique in data utilization.

4. SOME MAIN CONTENTS IN ANALYZING THE SITUATION OF AGRICULTURE, FOREST AND FISHERY COOPERATIVES

Phung Chi Hien

Information on agriculture, forest and fishery cooperatives is the main contents of the 2006 Rural, Agriculture and Fishery Census.

For a comprehensive evaluation of the situation of agriculture, forest and fishery cooperatives, we should carry out analyses on the following aspects:

- Characteristics of the cooperatives;
- Production and business conditions of the cooperatives;
- Size of the cooperatives;
- Government's assistance and support to the cooperatives;
- Production and business output of the cooperatives.
