

SUMMARIES IN ENGLISH

1. RESEARCH ON PERFECTING OF GOVERNMENT'S STATISTICAL SYSTEM OF INDICATORS

Dao Ngoc Lam

The article presented out the reality of government's statistical system of indicators last time. There are still some main weaknesses to overcome the following: Not complete yet; to be short of many key indicators and some quality indicators. To make good one's shortcoming over which have to do something as follows:

- To investigate reality situation which determine the demand of statistical information of levels;

- To promulgate statistical indicators by legal document.

Government's statistical system of indicators are about 300 indicators of which type.

2. COMPUTING OF GDP BY COMPARED PRICE THOUGHT I/O TABLE

Bui Trinh

The author used I/O table to calculate GDP at compared price with adjustment of factors as follows: Gross output product (GOP) was readjusted by produced price indexes. Price index GDP was calculated the formula as follows:

$$\text{Def GDP} = \text{GDP}_{\text{hh}} / \text{GDP}_{\text{ss}}$$

Of which: GDP_{hh} is GDP at current price

GDP_{ss} is GDP at compared price

$$\text{GDP}_{\text{ss}} = \sum_{j=1} VA_j + \text{import tax}$$

3. DESIGNING OF INFORMATION STATISTICAL ON INTERNET AND SOME POSE PROBLEMS

Hoang Minh Thien

In order to establish system of statistical information with internet have to do something as follows:

- To establish the source of unifying database;

- To train informatics for officers;

- To establish regulations for exploitation and supplying on information;

- There is an office for management of this issue;

- There is the source of final to preserve usually.
